ACCU-SAFE - Enclosed Chamber Verification Bottle Thermometers

FEATURES:

- *NIST Compliant® w/Certificate*
- *Individually Serialized and Certificate Provided with each Thermometer Kit*
- *Thermometers in 0.1°C - 0.5°C and 1.0°C Divisions*
- *Choose Environmentally Friendly Spirit Filled or Mercury Filled Thermometers*
- *Thermometers are Fluoropolymer Coated for Protection*
- *Unbreakable Bottle filled with Bio-Safe Glycol / Water Bottle Medium*

Our high-precision Bottle Thermometer Kits are reliable, economical and easy to read. Each kit consists of a thermometer housed in a break resistant plastic bottle filled with a **Bio-Safe Glycol/Water** solution (or sand for oven thermometers).
The thermometer bulbs are insulated to ensure accurate temperature readings with no temperature drift, even when the instrument door is opened. Thermometers are graduated in 0.5°C divisions and feature a Fluoropolymer coating for safety if broken. Each thermometer is individually serialized and includes a NIST Compliant® certificate.
